

# THE MONTAGU ARMS

## Electrical Vehicle Chargers

### How to use EV chargers

The Montagu Arms Hotel has 6 EV chargers per site costing 75p per kw hour.

We encourage Guests to download the ProjectEV Pro app prior to arrival to avoid any issues with WiFi in the carpark.

- 1 Download the Project EV Pro App (App Store, Google Play Store).
- 2 Sign up to the app, input an email address and password.
- 3 Add payment details to the account, using a debit or credit card.
- 4 Click balance, then click the plus icon to add funds into your account.
- 5 Scan the QR code on the charger.
- 6 Click start charging.
- 7 If you wish to start or stop a charge via an RFID tag you can register a tag as per the below.
- 8 Press register RFID tag.
- 9 Scan the QR code for the charger.
- 10 Tap your RFID device to the charger, such as a workplace ID badge.
- 11 Once the RFID device is registered as a tag you can start and stop a charging using the tag.
- 12 You can view charging history within the home page.
- 13 You can see the kW usage within the home history.
- 14 Once charging has ended you'll receive an email receipt with charging information for that session..

There is no charge for staying connected once the charge has stopped, however guests are politely asked to only park in the EV bays whilst their car is charging and to kindly relocate to a standard space to allow other EVs to charge.
