RESORT & SPA

## SHANTI WELLNESS

### BOOSTERS & INFUSIONS

To pair your health program, we have worked on a wellness drink menu which will be tailored for your needs for the entire stay including 3 drinks a day. This is specifically designed with essential minerals, vitamins, and antioxidants to make a noticeable impact on your healthy life routine. The bottom line of our wellness drink cure menu is that it is free from any chemicals and preservatives.

Complimentary handouts of tea herbs values are offered to you during this initiation journey. We will then set based on your length of stay a wellness drink plan covering the three key elements namely; a morning energy booster served during your breakfast at the restaurant or in your room, followed by a hydration wellness drink during the early afternoon and a relaxation wellness drink which can be a hot natural infusion set in your room for the evening after your drink. A daily consultation is offered on behalf of our doctor to follow up on the progress of your wellness journey with us.
