ESSENTIAL OIL BAR RITUAL AND CURE

Create your own essential oils in a safe, simple, and effective way through the Essential Oil Bar. We want to create a destination for essential oils enthusiasts to visit and explore new oils, products and even create their own essential oil blends. Our unique essential oil bar will allow you to discover some of your favorite blends, to then customize them as per the actual state of your body, mind, and soul. Essential Oils are highly concentrated extracts distilled or pressed from a variety of plant materials including leaves, flowers, fruit peels, grasses, woods, and roots. The powerful therapeutic effect of essential oils brings an instant sense of relief and comfort from your daily hectic and stressful life.

This tailor-made treatment is based on a 1-day session with a 120-minute experience. Treatment can be designed also depending on your length of stay which will implicate daily oil application massage for 30mins with your selected choice of essential oil and personal meeting with Spa Doctor on a daily basis to follow the progress of the development of the experience.

To keep it safe and memorable, a 'tester' session with our scent creator will be developed together with you and a complimentary tester of 10ML will be offered.
