

# South Causey Design Concept Plan

 South Causey Woodland Creation Areas

**Cpt 1**  
6.57ha  
Mosaic of non woodland habitats identified in NVC survey to kept as open ground. Use feathered wet carr woodland type species to link from higher density planting into open marsh/fen habitats. High density planting predominantly oak, birch, rowan, aspen and small % of Scots pine with mix of flowering natives and shrubs.

**Cpt 2**  
28.7ha  
Mosaic of non woodland habitats identified in NVC survey to kept as open ground. Buffer ponds and hedgerows with open ground. Buffer mature ASNW/PAWS woodland with open ground and feathered low density planting. High density planting to form core of fields - predominantly oak, birch, rowan, aspen, Scots pine with mix of flowering natives and shrubs.

Gas and power line utilities - buffer with open ground and plant lower growing species adjacent to buffered open ground.
