

Building Bridges

10 – 80+

1.5 – 2.5HRS

INDOOR OR OUTDOOR

Encouraging groups to work as a single, effective unit, Building Bridges sees participants using the equipment provided to construct a freestanding, fully mobile bridge that stretches from one side of a simulated ravine to the other.

Each group starts with the same basic set of equipment; however group members can complete various side activities in order to purchase additional materials from the onsite builders merchants store.

When the giant countdown clock hits zero, all building ceases and structures will undergo a series of assessments. Bank balances will be checked, bridge aesthetics compared and most importantly durability testing will commence. Firstly, the group must drive a remote controlled vehicle over their bridge without causing any damage.

If the structure passes this trial, the second stage of testing sees weight added until destruction occurs. Guaranteed to enthuse and unify, this high-energy activity demonstrates how effective team work can produce great results..

How much will it take before it breaks?

This package includes:

- Identical building kits for each team, including all tools required and large table graphics for protection
- A selection of suitable side activities, including all equipment
- 3m pop-up marquees at each activity area (location dependent)
- Dedicated event manager and activity compère
- Prize for the winning group/team
- All crew and activity instructors
- All pre-event planning and preparation – paperwork used onsite to be branded with client logo
- Transport/Delivery/Setup/Return

BOOSTS & BENEFITS

- Encourages effective planning
- Focuses the mind
- Teaches responsibility
- Unifies the group
- Builds effective partnerships
